Change History Table

The change history table below is updated each time the "Record Layouts" volume of the *FAFSA Specifications Guide* is updated providing you with a cumulative list of revisions made to the document.

The footer is updated to include the revision date.

Table 4A-2: Change History

Date	Page(s)	Changes/Notes
5/25	All	Volume 4A is released
7/25	22, 28, and 37	Revised the description for the Social Security Number fields 137 (Student Spouse), 171 (Parent), and 227 (Parent Spouse or Partner) to describe that an SSN with all zeros indicates the contributor does not have an SSN. If a FAFSA form is filed online and a contributor indicates they do not have a SSN, then the FAFSA Processing System fills the SSN field with all zeros.
8/25	Various	Revised the ISIR Record Layout Date fields to remove the valid date ranges from the following ISIR date fields: 8, 12, 13, 66, 130, 164, 182, 220, 254, 266, and 272 to 275.
8/25	47	Revised the Dependency Override field (282) to remove the inaccurate statement from the Field Name and Description, "Only the school that submitted the override receives the new ISIR transaction."
8/25	47	Updated the FAA Federal School Code field (283) to revise the description of Blank to clarify what a blank value indicates.
8/25	127	Revised the Decentralized High School Completion file report to remove the valid date ranges from fields 14 and 15.
8/25	135 and 136	Added information for creating a .CSV file for submitting verification of identity information using a batch file uploaded into the FAFSA Partner Portal.

Overview

What's in Volume 4A, Record Layouts?

This volume of the *FAFSA Processing Specifications Guide* provides the record layouts you need to create your own software to participate in the Electronic Data Exchange (EDE) process.

There may be additional changes as Federal Student Aid continues its development and clearance process of the 2026–27 FAFSA form. Additional updates will be provided as available with a final layout scheduled later this year.

Decentralized High School Completion File Record Layout

New for 2026–27: We added the Decentralized High School Completion File record layout, which contains FAFSA applicant data. This file is sent from the SAIG in the HSCI27OP message class and is sent to Decentralized State Agencies when the agency state and student's state of legal residence are the same.

Notes about the Decentralized High School Completion File:

- **Text-based, comma-delimited file** – This file type is also known as a comma-separated values or .csv file. Data in the file is separated by commas and can be viewed in any text editor. The data is organized into rows and columns with each column representing a field and each row representing a record. A comma (,) is used to separate field values within a record, and a newline character separates individual records.

- **Max Length** – This is the maximum number of bytes that will display for this field; however, the field could contain fewer bytes. For instance, the max length of the First Name field is 35, but if the applicant's name is "Susan" only five bytes will display.

- **Valid Content** – For fields with a maximum length of one byte, the digit included in the .csv file is associated with a value. For instance, if the High School Completion Status field contains a "3," then it indicates that the applicant was homeschooled. The .csv file will not include the text "Homeschooled."

Verification of Identity Record Layout

New for 2026–27: To facilitate Verification of Identity results reporting, you can create a comma-separated values (CSV) file with student information. After the file is created, it should be uploaded to the FAFSA Partner Portal using the batch upload, which is found on the landing page.

Notes about the Verification of Identity file:

- **Text-based, comma-delimited file** – Data in the CSV file is separated by commas and can be viewed in any text editor. The data is organized into rows and columns with each column representing a field and each row representing an individual student record. A comma (,) is used to separate field values within a record, and a newline character separates individual records.

- **Max Length** – This is the maximum number of bytes that will display for this field; however, the field could contain fewer bytes. For instance, the max length of the Student's Last Name field is 35, but if the applicant's name is "Jones" only five bytes will display.

- **Valid Content** – Editing is performed on the data before it can be uploaded, so be sure it is valid. For fields with a maximum length of one byte, the digit included in the .csv file is associated with a value.

- **Records to include in your Verification of Identity file**:

  – Students who have your Federal School Code listed on a transaction.

  – Students who were part of the V4 (custom verification group) or V5 (aggregate verification group).

  – Up to 2000 students per batch, one student per line.
