Correction Data Entry Specifications

You can use this table in conjunction with the Correction Record Layout found in *FAFSA Specifications Guide, Volume 4A – Record Layouts*. This table defines the valid field content for all correctable FPS fields. It includes the EDE number, field length, column for changes, and valid data to send for each field on a correction record. The table also indicates the FAFSA question number.

Use the EDE # as the EDE Field # in the Correction Export Record Layout. Adhere to the Valid Field Content values for the EDE # in the Valid Field Content for the corresponding Field Data field.

Notes:

- Data is sent using left justification without adding with leading zeros in numeric values. For example, a nine-digit field would be submitted as follows:

  - $1,234 would be sent as "1234"
  - -$5,678 would be sent as "-5678"

- The FAA cannot update all FAFSA data—including PII information—for a student or contributor. PII data includes the first, middle, or last name; suffix; Social Security number; or date of birth. Likewise, the FAA cannot add data for a new contributor to a record. In cases where the PII data needs to be corrected, the FAA must work with the student or contributor to have them make the necessary updates to their FAFSA data online or on a paper FAFSA Submission Summary.
